Other News

The Chief attend county mutual aid meetings for Washington and Johnson County fire associations. The members assisted with Highland homecoming parade in town. The members responded to Kalona for a high angle rescue of a subject who fell 30ft and was trapped inside feed mill still 30 feet off the ground. RFD aerial ladder truck and rope rescue equipment was used with KFD equipment and members to lower the subject to the ground to be transported by Air Care to UIHC. This was a very challenging call and all the members of Kalona and Riverside performed exceptional due to all of our training, preparation and dedication to providing a professional response. The 2 cities should be very proud of what they have for Fire, Rescue and EMS services. These types of incidents don't generally go well in small communities. I am very proud of our members and how skilled they are.

“WE”RE STILL HERE AND READY TO RESPOND”

Thanks

Good Morning Chirstine:

Allen had told me to not include design work on the items discussed with P&Z until Council had a chance to provide input/direction. I had included some of them only in concept exhibit in order for it to be better conveyed. The P&Z revisions are not extensive per my notes.

My notes showed 4 considerations. They are shown on the attached and listed as the following:

- A. Consider a 6-ft wide sidewalk instead of the 5-ft that had been shown on the perimeter walk. The 6-ft walk sections we would recommend if Council accepted this would be the sidewalk shown in pink in the attached.
- B. Consider signage for mile markers or distance around loop or number of laps per mile for walkers using the perimeter loop. We would suggest a sign being placed at the NW corner as indicated by "B" on the attached. The distance around the loop as currently shown is 955-ft or 0.18 miles or approximately 5.5 laps per mile.
- C. Consider saving the River Birch on the east side near S. Hickory Street. I didn't look at this tree to try to determine the health of it. I understand that the tree may not be able to be saved. The attached concept is shown with an island where the tree is. If the tree can't be saved, this island would then become two parking spaces instead of an island.
- D. Consider sidewalk connection to the Pavilion. This was mentioned at City Council, but I don't think was on the sketch shared with P&Z. It was mentioned at P&Z that this would be desirable. There was also comment to try to keep the perimeter trail somewhat separated from pavilion so that if the pavilion is being utilized, walkers using the perimeter trail wouldn't feel like they are intruding into the space.

These are the main items identified on the attached exhibit.

I plan on attending the City Council Meeting on Monday.

Let us know if you have any questions or comments.

Thanks.

COUNCIL PACKET

Date: October 11, 2021

To: Riverside Council

From: Bill Stukey, Operator

O & M Report: September 2021

Water Operation & Maintenance

- We changed cartridge filters at the water plant. Since switching to well 8 the filters have not been fouling as fast.
- I flushed a hydrant at the end of Schnoebelen St for yellow water. We try to flush this hydrant about once every few months to help the homeowner with some slightly rusty water.
- 8 Door postings.
- 18 locates, all complete.

Wastewater Operation & Maintenance

- Cleaned and adjusted floats on SBR tanks.
- Switched SBR tanks effluent valves for rotation.
- I tried locating a manhole in the timber behind senior village that is indicated on the old maps, but this manhole was not able to be located. I did find a manhole in Palmer's flower bed that was not shown on any maps. There is a possibility it was either mapped wrong or the other manhole is no longer there.
- I swapped SBR pump 1B with the spare. The pump was giving a seal fail alarm. I will have this pump checked by Electric Pump and provide a quote.
- We cleaned manhole #5 by senior village, there was a lot of debris in the manhole coming from Casey's. I also added some root destroyer to the lines to help mitigate any tree roots within this line.

- We sprayed some trees along the fence line on the north side of the wastewater plant. We plan to remove some of the brush that is growing up the hill this fall. This hill is not able to be mowed.

Re: Well #7 Findings

Greetings Bill:

WELL #7

We pulled the pump gear & performed the detailed inspection, below are the findings from that inspection & associated costs for repairs. To that end we are pleased to provide the following:

PUMP:

The pump can be rebuilt & reinstalled. The impellers need to be re-machined; the castings are thinning but not to the point that the pump has to be replaced, we do recommend epoxy coating this pump with the rebuild to lengthen its life. The collets can be re-used, & we will machine & install all new wear rings. The shaft will be polished & reinstalled. All new bolting will be installed as well.

MOTOR:

The motor is in need of replacement & or rebuild, the bearing has dropped out of tolerance & the seals are leaking water buy them, the motor runs but shows to ground when submerged in our test tank. We recommend replacing this motor due to it being an 2006, but we provided an option to ship it in for evaluation & estimate to rebuild for a spare motor if its able to be rebuilt.

PIPE:

The pipe is in fair condition, we did have to cut one apart above the check valve, but we will cut the bad portion off & re-thread it for the new check valve, this will only result in shortening of the pump set by 6", & is much less costly than replacing the entire 21' piece of pipe.

PITLESS SPOOL:

The pitless spool & O-rings are in good condition & can be reinstalled as is.

CHECK-VALVE:

The check valve is in need of replacement.

WIRE:

The wire is in good condition & can be reinstalled.

WELL:

There is nothing that indicates any major issue with the well, so we recommend mechanically cleaning the well & screen, via brush & bail, & then shock chlorination of the well prior to equipment being reinstalled.

USE OF FUNDS – per Treasury website

The Coronavirus State and Local Fiscal Recovery Funds provide eligible state, local, territorial, and Tribal governments with a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, and more equitable economy as the country recovers. Recipients may use these funds to:

- Support public health expenditures, by, for example, funding COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff
- Address negative economic impacts caused by the public health emergency, including economic harms to workers, households, small businesses, impacted industries, and the public sector
- Replace lost public sector revenue, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic
- Provide premium pay for essential workers, offering additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors
- Invest in water, sewer, and broadband infrastructure, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet
- Within these overall categories, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities.
